# Cash for Waste Paper

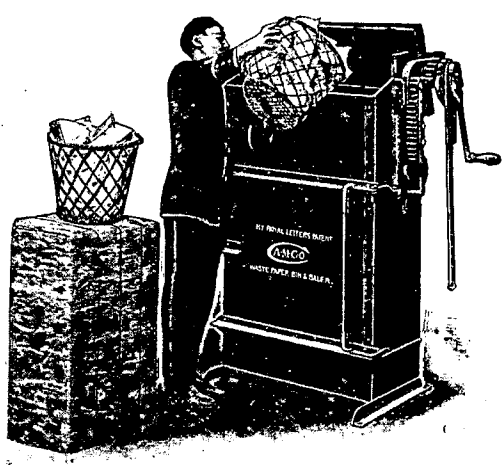

THERE is no reason why Waste Paper should be a *Liter* and no reason why it should be a *Loss*. Macerated or cut into strips  $\frac{3}{4}$  in. in width, it forms a valuable packing medium, stated by users to be superior to the more expensive wood wool.

The "CAMCO" Macerator as illustrated will macerate or cut into strips 250 to 800 lbs. per day of either Office or Shop Waste.

It is an indispensable adjunct for *Accountants, Insurance Offices, Banks, etc.* as, where cheques, legal documents, and other confidential papers form part of the "waste," macerating makes them safe for all time from misuse or prying eyes. Macerating is desirable under *any* circumstances if the best possible price is to be obtained for office "waste."

The lower illustration shows a "CAMCO" all-metal ever-ready Bin and Baler, which is essential to all Firms who have accumulations of waste. A smaller model is also made suitable for office use. The use of the "CAMCO" Baling Machine enables you to compress all your waste paper into bales that are readily saleable at good prices. By baling your waste paper in this way, only one-eighth of the storage room is required, and fire risks are greatly minimised.

Write to-day for prices and full particulars of these appliances, which will enable you to turn your waste paper into cash.

11. The waste paper bin & bales is priced at  
£17-10. The cost may come up to Rs 400 includ-  
ing freight & other charges. From local enquiries  
made there appears to be no local demand for  
paper for packing purposes. The waste paper  
thrown out of the office is now burnt. A  
machine of the sort now proposed will enable  
all such paper being cut up into strips and  
minimise the risk of any important paper  
being taken out of the office and getting into  
other hands though there have been no instances  
of the sort. It would be desirable  
to have one such machine for the office  
and it is just possible that there might be

a demand for the strips turned out by  
the macerator for packing purposes if  
sufficiently advertized. The cost may be  
met out of the provision under 'G.R.S. Contn.  
expenses' for the next year. Submitted with  
reference to paragraph 2. Through Post. Secy.

Buaramaniam  
3.5.16

Gen. Secy.

If the waste paper is going to be  
burnt, there is little use of cutting it  
into strips. This precaution is only  
necessary where the waste paper is  
sold for packing or other purposes,  
and has therefore to be accumulated  
in an office for some time before it  
is removed.

All  
4/5/16

Bu  
4/5

Gen. Secy.

Understands that there is much demand for strips  
for packing other purposes. More detailed figures  
should be made.

C/HP.

4th February, 1916.

The Secretary to the Govt. of His Highness the  
Maharaja of Mysore,  
General Dept.,  
Bangalore.

Sir,

Reference G9829/GM 368-15-3.

We are in receipt of your esteemed enquiry of the 12th ult. with regard to the "Camco" Macerator and "Camco" Baling Machine. The former Machine is made in four sizes the No. 4 size of which is the popular Model. It is Hand Driven (or can be attached to Power), a boy or a girl can easily manipulate it, as also the "Camco" Baler. The strips turned out by the Macerator are valuable for the purposes of packing, for which, in this country at the present time, there is a good demand, many firms using the product from this machine in place of paper wool which is costing now some.£10 per ton.

The Baling Machine is installed in hundreds of Newspaper and Printing Offices in this country and other establishments, such as Drapery and Wholesale Houses, and is found to be very useful for the compact packing of waste materials such as accumulates in offices or Works of any kind.

The enclosed letter gives all practical details and the method of operation is explained in the reprint from the "News-paper World".

Trusting to hear from you,

We beg to remain,

Yours respectfully,

THE CANADIAN AMERICAN MACHINERY COMPANY LTD

H. T. JOHNSON, M.I.Mech.E., Managing Director.

*Merchants and Dealers in Special Machinery.*

8, BOUVERIE STREET, LONDON, E.C., ENGLAND.

4th February, 1916.

The Secretary to the Govt of His Highness  
Maharaja of Mysore,  
General Dept.  
Bangalore.

Dear Sir,

We have pleasure in enclosing herewith literature dealing with our All-Metal Waste Paper Bin and Baler, the main features of which are its

SIMPLICITY - a youth can handle it and yet by its unique patented system of leverage, exert three tons pressure on the bale, its INDESTRUCTABILITY - is assured in that it is of all metal construction, yet the

PRICE - £17.10.0 for the Standard double lever 28 x 15 x 30" model, delivered free including 250 suitable binding wire ties - is less than is asked for less efficient Balers that occupy more space.

Our Baler occupies a floor space of 34 x 42" weighs 450 lbs., and turns out a bale weighing some 150-200 lbs., wired under pressure in fine style in one third the time of the old patterns where the pressure is obtained by means of a screw, which is slow and constantly requiring renewal.

By its adoption FIRE RISKS are reduced to a minimum as the paper does not lie about loose and the bales themselves when turned out of the press are as hard as a board, and in this state are practically NON-INFLAMMABLE and less unsightly than when bagged.

This permits the user to store waste paper until sufficient is accumulated to render it worth while calling in the waste paper dealer, as when wired under pressure, the bale occupies only one-sixth the space of bagged waste.

The Waste Paper Merchant prefers the waste in bales, as it enables him to carry away larger quantities at a time and store in a minimum of space besides getting favoured transport rates for baled as against bagged Waste, and at your service for any further information.

We remain,

Yours faithfully,

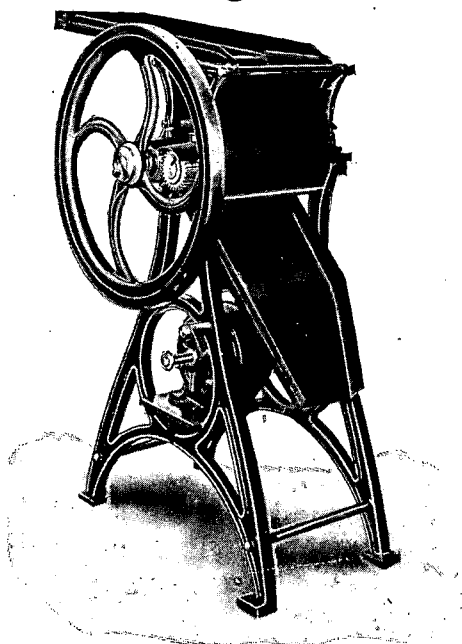

THE CANADIAN-AMERICAN MACHINERY CO. LIMITED.

## Halifax Evening and Weekly Courier.

Either reaches Two-Thirds the Town and Country Homes (Guaranteed).

Dear Sir, — As we are building ~~new~~ new premises, the baler you supplied to our order laid away unpacked. We thank you for machine, now tested, and beg to hand you our cheque, with all good wishes. Trials very satisfactory. Very sincerely,  
W. E. Denison.

### AMC Paper Macerating Machines

No. 4 Office Model.

A reliable Machine for destroying manuscript, documents, cheques, railroad and other tickets, etc., etc.

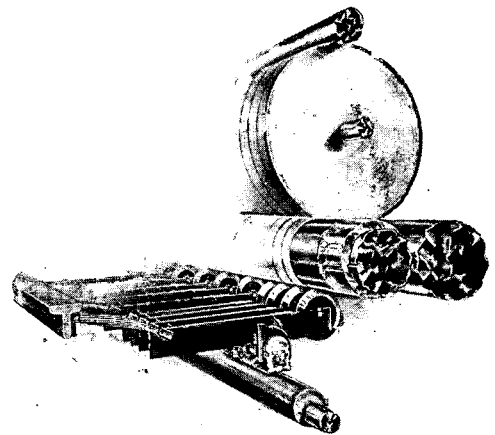

Invaluable for Municipal Offices, Banks, Railway Companies, Insurance Offices, etc.

# A Revolution in Slitting and Rewinding

A Universal Type Surface Rewind Operating on Paper of every description; also on Fabric, Duck, Rubber, Celluloid, &c.

(Maximum Width 180 inches).

In this machine known as the

British Patent Nos. 1740/12, 22624/12 and others pending.

## CAMERON SLITTER AND REWINDER

scoring discs pressing against a glass-hard steel roll are used, instead of the old-style revolving or circular shear cutters arranged in pairs, this entirely eliminating distortions of the slit product in its passage from the parent roll to the rewound coils, and ensuring perfect rewinding.

The first of this type of machine was built in 1910; with these earlier models have been furnished upwards of eight thousand disc cutters. We have never been called upon to replace a single cutter on account of defect from wear or failure to stand up to its work. This record is due to the unique patented design of this machine, to which eloquent testimony is forthcoming in the repeat orders already to hand for England and the Continent.

*Write for practical particulars, prices, &c., stating your requirements, to the*
